

Our Global Experience. Your Success.

Knowledge of sites & advanced patient recruitment strategies ensured trial success.

Situation:

Phase III Trial for severe Hospital Infection requiring 286 patients, to be recruited in 36 centers in 6 countries. Total recruitment was to be done in 1 year.

SIRO was asked to rescue the trial since recruitment efforts by another CRO were insufficient.

Challenges:

Recruitment of large number of patients in short period of time.

SIRO Strategy:

Close centers having inefficient & insufficient recruitment.

50% of centers in Germany which had insufficient recruitment were closed.

Open high enrollment centers in Greece.

Result:

Study was successfully rescued by recruiting 87 patients in just 180 days.

NDA filing was achieved by sponsor & SIRO was given a special award for rescuing the study.
