

CASE STUDY

FMCG trial conducted by a global sponsor with stringent timelines.

The Challenge

- The trial was needed to be completed in 2 months with limited budget.

SIRO Solution

- X-Sigma, SIRO's Excel-based Indigenous Clinical Data Management Platform implemented with following key functionalities:
 - a) No IT support cost.
 - b) Audit trail for core data.
 - c) Customizable Data Listings with filters.
 - d) Direct data exported into Statistical Analysis Report.
- Comprehensive training provided to the site personnel for swift data entry.
- Electronic import of data entered by site and query management, ensuring quality deliverables.

Key Takeaways

- Innovation and cost effective measures were well appreciated by the sponsor.
- X-Sigma application successful for FMCG trials.
